Element Performance Inspection (EPI) Data Collection Tool 5.1.9 RVSM Authorization (AW)

ELEMENT SUMMARY INFORMATION

Purpose of This Element (Certificate Holder's responsibility):

 To ensure that the Certificate Holder conducts RVSM operations safely and uses aircraft that are equipped, maintained, and capable of operating in RVSM airspace.

Objective (FAA oversight responsibility):

- To determine if there were any changes in the personnel identified by the Certificate Holder as having responsibility and/or authority for the RVSM Authorization process.
- To determine if the Certificate Holder follows its procedures, controls, process measurements and interfaces for the RVSM Authorization process.

Specific Instructions:

• To accomplish this EPI, the Inspector shall verify the Certificate Holder follows its policies and procedures for its RVSM program, to include tooling utilized to maintain aircraft. The Inspector shall verify that only trained and qualified personnel perform maintenance on RVSM aircraft. The Inspector shall verify that technical data being used for RVSM is current. The Inspector shall verify that the Certificate Holder reports all systems failures/abnormalities with the RVSM system to the FAA Certificate Holding District Office.

EPI	SECTION 1 – PERFORMANCE OBSERVABLES	
-	ective: (FAA oversight responsibility): To determine if the Certificate Holde cedures, controls, process measures and interfaces for the RVSM Authoriz	
Tas	ks	
	To meet this objective, the inspector must accomplish the following tasks:	
1	Review the information listed in the Supplemental Information section of t tool.	his data collection
2	Review the policies, procedures, instructions and information for the RVSM Authorization process contained in the Certificate Holder's manual.	
3	Review the associated SAI for this element with emphasis on the controls, process measurements and interface attribute sections.	
4	Observe the RVSM Authorization process to gain an understanding of the procedures, instructions and information contained in the Certificate Holder's manual.	
5	Discuss the RVSM Authorization process with the personnel (other than management) who perform the duties and responsibilities required by the process.	
Que	estions	
	To meet this objective, the inspector must answer the following questions	:
1.	Were the following Performance Measures met:	
1.1	Did the Certificate Holder comply with RVSM provisions of operations specifications D092?	☐ Yes ☐ No, Explain
1.2	Were personnel (including inspection personnel) who determine the adequacy of work trained in accordance with the Certificate Holder's policies and procedures?	☐ Yes ☐ No, Explain
	Related Performance JTI's:	
	 Check at the air carrier specified location that personnel have been trained in accordance with the Certificate Holder's design. Sources: 121.375; 121.135(b)(1) 	
1.3	Were personnel who perform maintenance on the RVSM systems properly trained, qualified, and knowledgeable in accordance with the Certificate Holder's method?	☐ Yes ☐ No, Explain
1.4	Were the Certificate Holder's current RVSM technical documents available to RVSM maintenance personnel?	☐ Yes ☐ No, Explain
	 Related Performance JTI's: Check at the air carrier specified location that an RVSM manual is available to personnel working RVSM aircraft in accordance with the Certificate Holder's design. Sources: 121.135(b)(1); 121.135(b) 	
1.5	Did the Certificate Holder notify the CHDO of any system failures or abnormalities in accordance with its policies and procedures?	☐ Yes ☐ No, Explain ☐ Not Applicable
	 Related Performance JTI's: 1. Check at the air carrier specified location that the Certificate Holder reported altitude–keeping errors to the Administrator for each event in which the operator's aircraft has exhibited total vertical error of 300 feet or more 	

EPI Template

	2.	in accordance with the Certificate Holder's design. Sources: 121.135(a)(1); 91 AppGSection 6(a) Check at the air carrier specified location that the Certificate Holder reported altitude–keeping errors to the Administrator each event in which the operator's aircraft has exhibited altimetry system error of 245 feet or more in accordance with the Certificate Holder's design.	
	3.	Sources: 121.135(a)(1); 91 AppGSection 6(b) Check at the air carrier specified location that reported altitude–keeping errors to the Administrator for each event in which the operator's aircraft has exhibited assigned altitude deviation of 300 feet or more in accordance with the Certificate Holder's design. Sources: 121.135(a)(1); 91 AppGSection 6(c)	
1.6		the Certificate Holder audit the RVSM process to ensure its policies procedures were followed?	☐ Yes ☐ No, Explain
	Rel	ated Performance JTI's:	, '
	1.	Check at the air carrier specified location that functional flight tests were performed in accordance with the Certificate Holder's design. <i>Sources:</i> 121.135(b)(16); 91 AppGSection 3(b)(1)(i)	
	2.	Check at the air carrier specified location that the RVSM quality assurance program ensured continuing accuracy and reliability of test equipment used for RVSM aircraft in accordance with the Certificate Holder's design. Sources: 121.135(b)(16); 91 AppGSection 3(b)(1)(ii)	
	3.	Check at the air carrier specified location that operator and the operator's aircraft operated in RVSM airspace complied with the requirements of 14 CFR 91 Appendix G in accordance with the Certificate Holder's design. Sources: 91.706(a)(1); 121.135(b)(24)	
1.7	Did	the Certificate Holder's aircraft have the correct version of TCAS	□ Yes
	inst	alled?	□ No, Explain
	Rel	ated Performance JTI's:	·
	1.	Check at the air carrier specified location to assure that avionics units installed in each aircraft meet the minimum RVSM equipment requirements were of a different manufacturer or part number. The operator demonstrated that the equipment provided equivalent system performance in accordance with the Certificate Holder's design.	
	2.	Sources: 121.135(b)(16); 91 AppGSection 1(c)(2) Check at the aircraft that Traffic Alert and Collision Avoidance System (TCAS) met TSO C–119b (Version 7.0), or a later version in accordance with the Certificate Holder's design. Sources: 121.135(b)(1); 91 AppGSection 2(g)	

1.8		maintenance personnel follow the methods to verify that components parts are eligible for installation in the RVSM system?	☐ Yes ☐ No, Explain
	Rela	ated Performance JTI's:	,
	1.	Check at the air carrier specified location that inspection procedures were followed in accordance with the Certificate Holder's design. <i>Sources:</i> 121.135(b)(16); 91 AppGSection 3(b)(1)(i)	
	2.	Check at the air carrier specified location that the RVSM quality assurance program ensured continuing accuracy and reliability of test equipment used for RVSM aircraft in accordance with the Certificate Holder's design. Sources: 121.135(b)(16); 91 AppGSection 3(b)(1)(ii)	
	3.	Check at the air carrier specified location that the Certificate Holder has complied with procedures for returning non–compliant aircraft to service in accordance with the Certificate Holder's design. Sources: 121.135(b)(1); 91 AppGSection 3(b)(1)(iii)	
	4.	Check at the air carrier specified location that avionics units installed in each aircraft meet the minimum RVSM equipment requirements were manufactured to the same manufacturer specification and have the same part number in accordance with the Certificate Holder's design. Sources: 121.135(b)(16); 91 AppGSection 1(c)(1)	
	5.	Check at the air carrier specified location that the procedures were followed to maintain requirements for RVSM aircraft in accordance with the Certificate Holder's design. Sources: 91 AppGSection 3(b)(1); 121.135(b)(1)	
	6.	Check at the air carrier specified location that periodic inspections were performed in accordance with the Certificate Holder's design. <i>Sources:</i> 121.135(b)(16); 91 AppGSection 3(b)(1)(i)	
1.9	in n	maintenance personnel follow the Certificate Holder's method otifying the crew when the aircraft has been restricted from SM operations?	☐ Yes ☐ No, Explain
1.10		maintenance personnel follow the Certificate Holder's method to ure conformance to the RVSM maintenance standards?	☐ Yes ☐ No, Explain
	Rela	ated Performance JTI's:	, ,
	1.	Check at the air carrier specified location that maintenance procedures were followed in accordance with the Certificate Holder's design.	
	2.	Sources: 121.135(b)(16); 91 AppGSection 3(b)(1)(i) Check at the air carrier specified location that inspection procedures were followed in accordance with the Certificate Holder's design. Sources: 121.135(b)(16); 91 AppGSection 3(b)(1)(i)	
	3.	Check at the air carrier specified location that the Certificate Holder has complied with procedures for returning non–compliant aircraft to service in accordance with the Certificate Holder's design. Sources: 121.135(b)(1); 91 AppGSection 3(b)(1)(iii)	
1.11		maintenance personnel follow the Certificate Holder's method in	□ Yes
		rning an aircraft to service after maintenance has been performed on RVSM component/system to continue RVSM operations?	□ No, Explain

	1.12Did maintenance personnel follow the Certificate Holder's method in returning an aircraft to service after the aircraft was determined to be restricted from RVSM operations?	☐ Yes ☐ No, Explain
	 Related Performance JTI's: 1. Check at the air carrier specified location that the Certificate Holder has complied with procedures for returning non–compliant aircraft to service in accordance with the Certificate Holder's design. Sources: 121.135(b)(1); 91 AppGSection 3(b)(1)(iii) 	
2	Were the Certificate Holder's policies, procedures, instructions and information, contained in its manual, for the RVSM Authorization process followed?	☐ Yes ☐ No, Explain
	 Related Performance JTI's: Check at the air carrier specified location that aircraft operated within airspace designated as Reduced Vertical Separation Minimum (RVSM) airspace, complied with 91.706 in accordance with the Certificate Holder's design. Sources: 91.703(a)(4); 121.135(a)(1) Check at the FAA specified location for authority to conduct RVSM operations. Sources: 91.706(a)(2); 121.135(b)(1) Check at the air carrier specified location that deviation has been granted from the requirements of this section in accordance with Section 5 of Appendix G to this part. Sources: 121.135(b)(1); 91.706(b) 	
	3. Were the RVSM Authorization process controls followed?	☐ Yes ☐ No, Explain
	4. Did the records for the RVSM Authorization process comply with the instructions provided in the Certificate Holder's manual?	☐ Yes ☐ No, Explain
5	5. Were the process measurements for the RVSM Authorization process effective in identifying problems or potential problems and providing corrective action for them?	☐ Yes ☐ No, Explain
6	6. Did personnel properly handle the associated interfaces by complying with other written policies, procedures, instructions and information that are related to this element?	☐ Yes ☐ No, Explain

EPI	SECTION 2 - MANAGEMENT RESPONSIBILITY & AUTHORITY OBSER	RVABLES
and resp	ective: To determine if the person identified by the Certificate Holder havin /or authority for the RVSM Authorization is qualified, knowledgeable, and reponsibility and/or authority. (The person with the authority may or may not be responsibility.)	ecognizes that
Tas	ks	
	To meet this objective, the inspector must accomplish the following tasks:	
1	Identify the person who has overall responsibility for the RVSM Authorizati	ion process.
2	Identify the person who has overall authority for the RVSM Authorization p	
	NOTE: If no personnel or major program changes (as defined by the Princ affecting the responsibility or authority attributes for this element have occlust SAI and/or EPI was accomplished, then do not perform tasks 3 – 6. At 2.1 & 2.2, and provide the name/title.	urred since the
3	Review the duties and responsibilities for the person(s) who manage the R Authorization process documented in the Certificate Holder's manual.	RVSM
4	Review the appropriate organizational chart.	
5	Discuss the RVSM Authorization process with the management personnel Tasks 1 and 2.	identified in
6	Evaluate the qualifications and work experience of the management personant 2.	nnel identified in
Que	estions	
	To meet this objective, the inspector must answer the following questions:	
2.	Are the following aspects of the Management Responsibility and Authority addressed for the RVSM Authorization process:	Attributes
2.1	Is there a clearly identified person who is responsible for the quality of the RVSM Authorization process?	☐ Yes ☐ No, Explain Name/Title:
2.2	Is there a clearly identified person who has authority to establish and modify the Certificate Holder's policies, procedures, instructions and information for the RVSM Authorization process?	☐ Yes ☐ No, Explain Name/Title:
2.3	Does the responsible person know that he/she has responsibility for the RVSM Authorization process?	☐ Yes ☐ No, Explain ☐ Not Applicable
2.4	Does the person with authority know that he/she has authority for the RVSM Authorization process?	☐ Yes ☐ No, Explain ☐ Not Applicable
2.5	Does the person with responsibility for the RVSM Authorization process meet the qualification standards?	☐ Yes ☐ No, Explain ☐ Not Applicable
2.6	Does the person with authority to establish and modify the RVSM Authorization process meet the qualification standards?	☐ Yes ☐ No, Explain
